

# FLOOD INSURANCE

NIFP: Lawton participates in the National Flood Insurance Program (NFIP). The NFIP makes federally backed flood insurance available for all buildings, whether they are in a floodplain or not. Flood insurance covers direct losses caused by surface flooding, including a river flowing over its banks, a lake or ocean storm, and local drainage problems.

The NFIP insures buildings, including mobile homes, with two types of coverage: structural and contents. Structural coverage is for the walls, floors, insulation, furnace, and other items permanently attached to the structure. Contents coverage may be purchased separately provided the contents are in an insurable building.

MANDATORY PURCHASE REQUIREMENT: The mandatory purchase requirement applies to all forms of federal or federally related financial assistance for buildings located in a Special Flood Hazard Area (SFHA). This requirement affects loans and grants for the purchase, construction, repair, or improvement of any publicly or privately owned building in the SFHA, including machinery, equipment, fixtures, and furnishings contained in such buildings.

Financial assistance programs affected include loans and grants from agencies such as the Department of Veterans Affairs, Farmer Home Administration, Federal Housing Administration, Small Business Administration, and Federal Emergency Management Agency. The requirement also applies to secured mortgage loans from financial institutions, such as commercial lenders, savings and loan associations, savings banks, and credit unions that are regulated, supervised or insured by Federal agencies such as the Federal Deposit Insurance Corporation and the Office of Thrift Supervision. It also applies to all mortgage loans purchased by Fannie Mae in the secondary mortgage market.

HOW IT WORKS: Before a person can receive a loan or other financial assistance from one of the affected agencies or lender, there must be a check to see if the building is in a SFHA. The SFHA is the base (1 %) floodplain mapped on a Flood Insurance Rate Map (FIRM). It is shown as one or more zones that begin with the letter "A" or "V".

Copies of the FIRM are available for review in the Stormwater Management Division, City Hall, 212 SW 9<sup>th</sup> Street, Lawton. Many lenders and insurance agents also have copies. It is the agency's or the lender's responsibility to check the FIRM to determine if the building is in an SFHA, although the Stormwater Management Division provides assistance.

If the building is in a SFHA, the agency or lender is required by law to require the recipient to purchase a flood insurance policy on the building. The requirement is for structural coverage equal to amount of the loan (or other financial assistance) or the maximum amount available, whichever is less. The maximum amount available for a single-family house is \$250,000.

The mandatory purchase requirement does not affect loans or financial assistance for items that are not covered by flood insurance policy, such as vehicles, business expenses, landscaping, and vacant lots. It does not affect loans for buildings that are not in the SFA, even though a portion of the lot may be floodprone. While not mandated by law, a lender may require a flood insurance policy as a condition of a loan for a property in any zone of a Flood Insurance Rate Map.

# FLOOD HAZARD

## CHECK BEFORE YOU BUY

Flooding and other surface drainage problems can occur well away from a river, lake, or ocean. If you're looking at a property, it's a good idea to check out the possible flood hazard before you buy. Here's why

- The force of moving water or waves can destroy a building
- Slow-moving floodwater can knock people off their feet or float a car
- Even standing water can float a building, collapse basement walls, or buckle a concrete floor.
- Water-soaked contents, such as carpeting, clothing, upholstered furniture, and mattresses, may have to be thrown away
- Floodwaters are not clean: floods carry mud, farm chemicals, road oil, and other noxious substances that cause health hazards.
- The impact of a flood—cleaning up, making repairs, and the personal losses – can cause great stress to you, your family, and your finances.

**FLOODPLAIN REGULATIONS:** The City of Lawton regulates construction and development in the floodplain to ensure that buildings will be protected from flood damage. Filling and similar projects are prohibited in certain areas. Structures located in the floodplain that have been substantially damaged by fire, flood, or any other cause, are required to obtain a special building permit and must comply with the current flood hazard regulations.

**CHECK FOR THE FLOOD HAZARD:** Before you commit yourself to buying property do the following:

- Ask the seller and the neighbors if the property is in a floodplain, how long have they lived there, if the property has ever been flooded, and if it is subject to any other hazards.
- Ask the local building, planning, or engineering department if the property is in a floodplain; if the area has ever been flooded; what the flood depth, velocity, and warning times are; if it is subject to any other hazard; and what building or zoning regulations are in effect.
- Remember, even those properties that are not located in a designated floodplain area may flood

**FLOOD PROTECTION:** A building can be protected from most flood hazards, sometimes at a relatively low cost. New buildings and additions can be elevated above flood levels. Existing buildings can be protected from shallow floodwater by regrading, berms, or floodwalls. There are other retrofitting techniques that can protect a building from surface water. Information is available in the Lawton Public Library or in the License & Permit Division

**FLOOD INSURANCE:** One of the best protection measures for a building with a flood problem is National Flood Insurance, which is purchased through any property insurance agent. You can get flood insurance even if your property is not in the floodplain, but if your building is located in a floodplain, flood insurance will be required by most mortgage lenders (see other side). Be sure to include the cost of the policy in your mortgage and financial planning.
