

STORM DRAIN MARKING

This activity consists of volunteers affixing buttons with a “don’t dump” message to storm drain inlets or painting a “don’t dump” message on the inlet with a stencil. This effort will focus on older areas of the city and those areas known to be more problematic. Students and involved community citizens can stencil inlets through classroom education projects and community involvement projects. Lawton will try to utilize as many organizations as possible. If your organization is interested in participating in a storm drain marking event, contact one the Stormwater Management employees at (580)581-3478.

Remember to clean up all spills when they happen! If building materials or other wastes get into a gutter, storm drain, or creek call Stormwater Hotline immediately at (580) 581-3565.

STREAM CLEANUP

The City of Lawton coordinates stream cleanup projects with various volunteer groups and organizations. Specific sites are selected based on impact of trash, especially those areas with heavy pedestrian and vehicular traffic for optimum aesthetic improvement. Stream cleanup projects are a great way to improve aquatic habitat, water quality and aesthetics while promoting stormwater awareness. Organizations are encouraged to participate in the Adopt-A Stream project and commit to cleaning a ½ mile to 1 mile portion of stream at least once every three months. A sign with your organizations name will be posted at the stream. Contact a Stormwater Management employee if you have questions about or are interested in scheduling a stream cleanup project.

Remember to clean up all spills when they happen! If building materials or other wastes get into a gutter, storm drain, or creek call Stormwater Hotline immediately at (580) 581-3565.
